Dr. R. R. Porter
National Institute for Medical Research
Mill Hill
London, N.W.7, England

Dear Dr. Porter:

I have been trying to hunt down a reference to some work that may have been done in or near your laboratory on the continued turnover of antibody in animals in a state of immune paralysis. Can you put me onto the reference for this work?

Yours sincerely,

Joshua Lederberg
Professor of Medical Genetics
(dictated but not read)
